Fidelity Desktop App (Aug 2021 - Present)

Role : .Net Developer
Technical Environment : Asp.net MVC, Blazor, SQL server.
Team size : 8

About Project :

Fidelity Desktop is used to place Title orders. The attorney on registering and on logging in can place different kinds of orders Agent Desk FX Order, Agent Desk Non-FX Order and Order Desk Order. They can also generate CPL Order. "Land is as old as time itself. Like the structures built on it, land is "real property", meaning that it can't be moved or hidden. Because real property is valuable, many people want to claim ownership. "Titles" came about as a means of legally proving who owns the property". Title search is a means of ascertaining that the person who is selling the property really has the right to sell it, and that the buyer is getting all the rights to the property that he or she is paying for. Several aspects like chain of title, Tax search, Report or possession are examined during Title Search. Fidelity Desktop is basically used by attorneys to place title search orders. Fidelity Desktop also provides the opportunity to perform the examination instantly on properties.
